THE DISC BRAKE CALIPER TORQUE WRENCH EXTENSION ALLOWS YOUR MECHANICS TO PROPERLY TORQUE Meritor DISC BRAKE CALIPER BOLTS TO THE TORQUE PLATE. THIS WRENCH ALLOWS ACCESS TO MOUNTING BOLTS LOCATED ON THE AXLE THAT WOULD BE OTHERWISE INACCESSIBLE DUE TO THE CLOSE PROXIMITY OF THE AIR RIDE BEAM. THE WRENCH DESIGNED TO BE USED WITH ALL ¾ INCH DRIVE TORQUE WRENCHES AND IS FINISHED TO ENHANCE DURABILITY.

THE 12 POINT 30MM SOCKET IS MADE SPECIFICALLY FOR THIS APPLICATION AND IS DESIGNED TO ENSURE YOUR BRAKE CALIPERS ARE SECURELY MOUNTED WITH BOLTS TIGHTENED TO MANUFACTURES TORQUE SPECIFICATIONS.

When using the F-30MMDBW - 3256B1354, bolt torque become a one-person job.

Torque Spec using this adapter Using a 36" Torque Wrench is 363 ft. lbs.

After all disc brake caliper bolts have been torqued, clean the wrench and return to storage.
